

WANTED

RECENT EARTH SCIENCE GRADUATE

QUIK_LOG GEOPHYSICS (PTY) LTD

A Borehole Geophysical Logging Consultancy and Contractor

We are looking for a pro-active , recent earth science graduate for a diverse, multi-tasking technical and business position within a long established borehole geophysical (wireline) logging group based in the Johannesburg/Midrand area but operating in field locations across southern and central Africa . In these areas we operate in the mining, mineral exploration, engineering geology and geological prospecting sectors, employing a wide spectrum of downhole sensors(tools) to map mineral resources , host rock lithologies , structures , geotechnical parameters including rock strengths and hydrogeological parameters for aquifer characterization .

The position is office-based , reporting to the DP Manager , and will entail software-driven processing of multi-tool data sets from input of field data to output of final plots, client communications re specific proposals , and assisting the MD in the preparation of formal project proposals and tender responses . Intending applicants should have an earth science degree or diploma, some earth science field experience, an outgoing personality, a good command of spoken and written (technical) English, plus standard computer skills including the Windows Office range .Hands-on training will be provided by the DP Manager and the MD/Consulting Geophysicist . Applicants must be South African citizens, have a code 08 license and preferably have their own transport .The office is based in the Johannesburg central suburb of Greenside .
